

Fill the circles

DRAFT FOR PHYSICAL TRIAL – NOT APPROVED
Digital instructions and targets. Physical materials and completion remain unvalidated.

Artwork: 400 x 500 mm | dots

For the trial participant: work on a small area first. The operator must supply and approve the trial materials before use.

1. Find a small area

Choose a few outlined circles. The spaces between them are part of the image.

2. Fill each circle

Use the trial marker to fill inside each circular boundary. Keep separate circles separate.

3. Follow the changing sizes

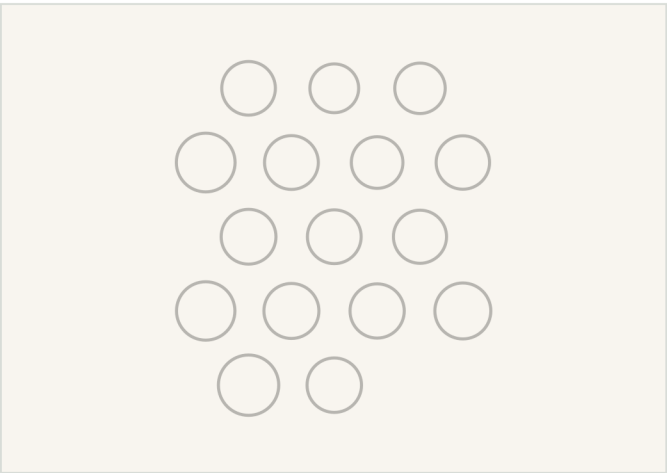

Fill the shape that is printed, including the smaller circles. Do not turn every mark into the same size.

4. Compare and record

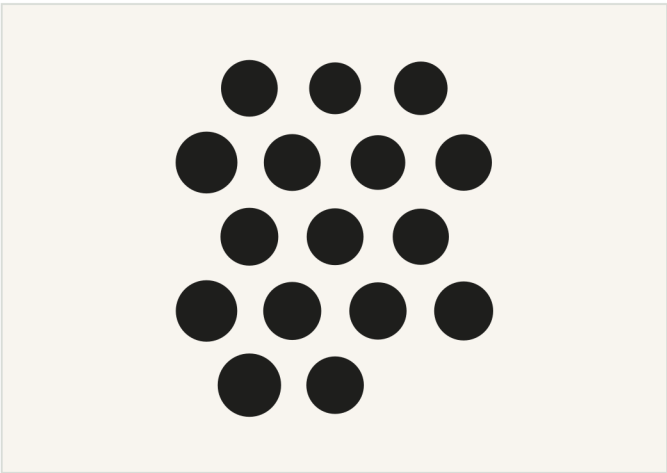

Compare the filled area with the digital reference. Record guide visibility, control and any marks that join.

THE SAME SAVED MARKS, IN TWO VIEWS

Printed guide (digital)

Filled / traced target (digital)

Selected whole marks, shown at about 270% of their artwork size on a 100% A4 print. Other marks and personal lettering are omitted. These are not hand-completed samples.

Colour key & trial materials

DRAFT FOR PHYSICAL TRIAL – NOT APPROVED
Digital instructions and targets. Physical materials and completion remain unvalidated.

Artwork: 400 x 500 mm | dots

DIGITAL COLOUR KEY

Selected artwork ink

 Single ink #1e1e1c

Blank canvas is not an additional numbered colour. These screen/print swatches do not verify a marker match. Assign physical markers by the key before the trial.

OPERATOR: PACKING REQUIREMENTS

Unconfirmed items. This list is not a packing or product approval record.

- ☐ Printed canvas: 400 x 500 mm; substrate and finish require trial approval.
- ☐ Mode-appropriate marker for single ink #1e1e1c; tip, SKU, lot and quantity unassigned.
- ☐ Printed making guide and colour key; this draft still requires a physical comprehension trial.

BEFORE APPROVING PHYSICAL INSTRUCTIONS

Record marker assignments, coverage and handling; test guide readability, comfort and first-time understanding. Supplier handling and drying guidance still needs review. No drying time or pen quantity is claimed here.

Fill the cells

DRAFT FOR PHYSICAL TRIAL – NOT APPROVED
Digital instructions and targets. Physical materials and completion remain unvalidated.

Artwork: 400 x 500 mm | mosaic

For the trial participant: work on a small area first. The operator must supply and approve the trial materials before use.

1. Check the key first

For numbered cells, match the printed number to the key on page 2. The operator must first assign and test the physical markers.

2. Fill within each cell

Fill the outlined cell with its assigned colour. In a single-ink design, use the selected ink for every cell.

3. Keep the blank spaces

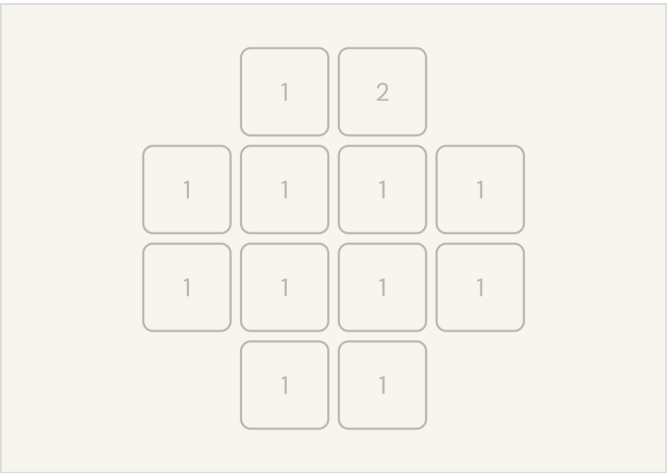

Leave areas without cells unmarked. Blank paper is not an extra numbered marker colour.

4. Compare and record

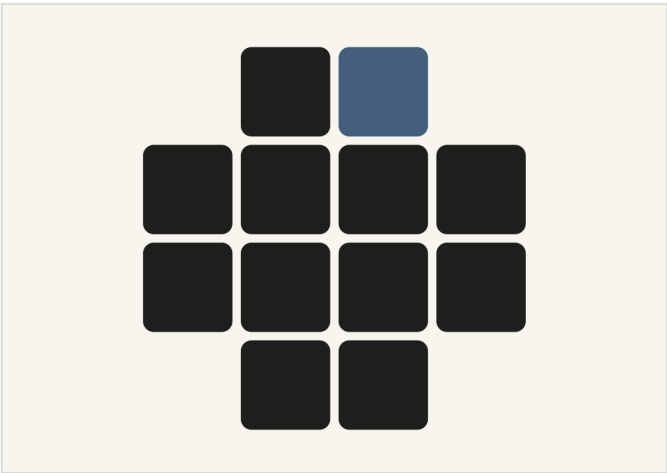

Compare a small filled area with the digital reference. Record number readability, colour matching and coverage.

THE SAME SAVED MARKS, IN TWO VIEWS

Printed guide (digital)

Filled / traced target (digital)

Selected whole marks, shown at about 185% of their artwork size on a 100% A4 print. Other marks and personal lettering are omitted. These are not hand-completed samples.

Colour key & trial materials

DRAFT FOR PHYSICAL TRIAL – NOT APPROVED
Digital instructions and targets. Physical materials and completion remain unvalidated.

Artwork: 400 x 500 mm | mosaic

DIGITAL COLOUR KEY

Key / selected colour / cells in this artwork

-  Key 1 #1e1e1c | 3268 cells
-  Key 2 #445e7c | 190 cells
-  Key 3 #7b8b77 | 0 cells (unused)
-  Key 4 #b97a68 | 147 cells

Blank canvas is not an additional numbered colour. These screen/print swatches do not verify a marker match. Assign physical markers by the key before the trial.

OPERATOR: PACKING REQUIREMENTS

Unconfirmed items. This list is not a packing or product approval record.

- ☐ Printed canvas: 400 x 500 mm; substrate and finish require trial approval.
- ☐ Marker matching key 1 (#1e1e1c); SKU, lot and quantity unassigned.
- ☐ Marker matching key 2 (#445e7c); SKU, lot and quantity unassigned.
- ☐ Marker matching key 4 (#b97a68); SKU, lot and quantity unassigned.
- ☐ Printed making guide and colour key; this draft still requires a physical comprehension trial.

BEFORE APPROVING PHYSICAL INSTRUCTIONS

Record marker assignments, coverage and handling; test guide readability, comfort and first-time understanding. Supplier handling and drying guidance still needs review. No drying time or pen quantity is claimed here.

Trace the paths

DRAFT FOR PHYSICAL TRIAL – NOT APPROVED

Digital instructions and targets. Physical materials and completion remain unvalidated.

Artwork: 400 x 500 mm | contour

For the trial participant: work on a small area first. The operator must supply and approve the trial materials before use.

1. Find one guide path

Start with a short section and follow the printed route. Separate paths remain separate.

2. Trace along the guide

Use the trial marker to follow the path. The finished reference shows the intended line, not a filled region.

3. Keep the open spaces

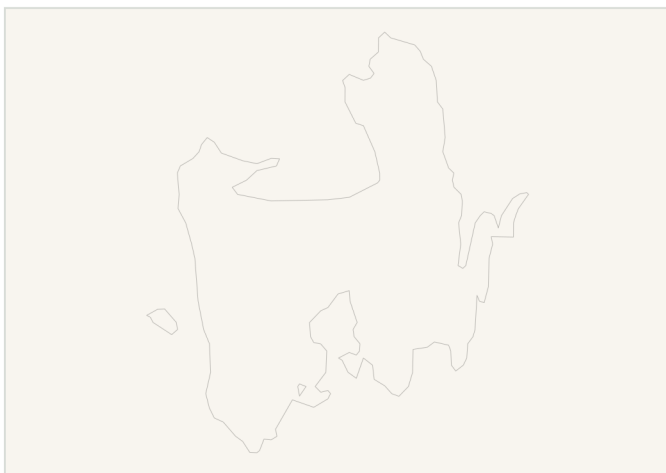

Do not fill between paths or connect their ends unless the printed guide already connects them.

4. Compare and record

Compare the traced section with the digital reference. Record control, line width and where the guide remains visible.

THE SAME SAVED MARKS, IN TWO VIEWS

Printed guide (digital)

Filled / traced target (digital)

Selected whole marks, shown at about 55% of their artwork size on a 100% A4 print. Other marks and personal lettering are omitted. These are not hand-completed samples.

Fill the horizontal strips

DRAFT FOR PHYSICAL TRIAL – NOT APPROVED
Digital instructions and targets. Physical materials and completion remain unvalidated.

Artwork: 400 x 500 mm | line-amplification

For the trial participant: work on a small area first. The operator must supply and approve the trial materials before use.

1. Use a ruler or straight edge

A ruler or straight edge is required for this activity. Align it with the long horizontal edge of a printed strip.

2. Fill the outlined strip

Fill between the two printed boundaries. Follow the changing strip thickness; do not replace it with one thin centre line.

3. Keep the interruptions

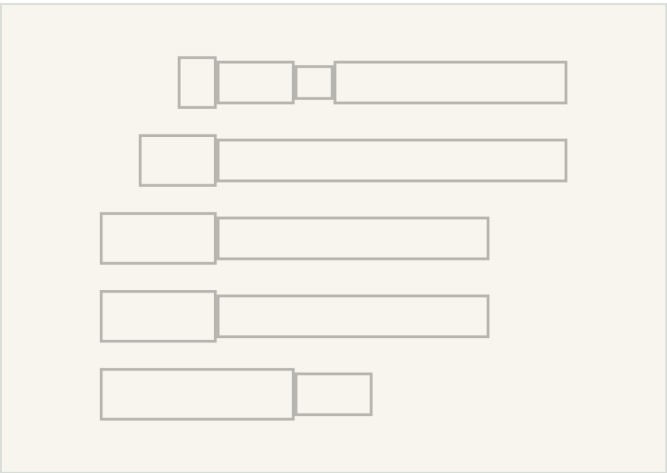

Leave blank gaps between strips unmarked. Move the straight edge carefully and observe any dragging or smearing during the trial.

4. Compare and record

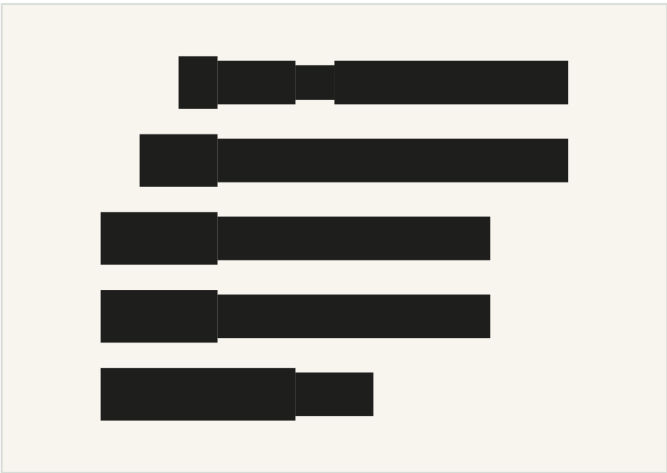

Compare with the digital reference. Record ruler handling, edge control and whether the narrow strips are comfortable to fill.

THE SAME SAVED MARKS, IN TWO VIEWS

Printed guide (digital)

Filled / traced target (digital)

Selected whole marks, shown at about 245% of their artwork size on a 100% A4 print. Other marks and personal lettering are omitted. These are not hand-completed samples.
